

ADR18 Housing

ADR18住宅建筑

The building is located in Milan (Italy), inside the industrial Bovisa Quarter. Here new housing buildings coexist close to warehouses, gasometers, chimneys and workshops.

The project concerns the residential transformation of a warehouse. The client, a real estate developer, required a young and up-to-date look for his new apartments. The design made by

LPzR architects keeps the former building perimeter and adds a new livable floor. Four apartments are placed at the ground floor and four at the first floor.

The main building volume is a simple red parallelepiped. An apparently random pattern of windows is applied, generating dynamic effects on the main façade. The asymmetries of the solid white frames give the façade a unique three-dimensional look.

该建筑坐落在意大利米兰的一片工业区内，紧临仓库、煤气站、厂房和车间。

该住宅建筑是由一座仓库改建而成的。业主是一位地产商，他要求为住宅建筑赋予年轻而又时尚的外观。由LPzR建筑事务所打造的这个项目保留了原有建筑的整体轮廓，并加建了一个楼层作为生活区。一层和二层分别设置了4套公寓单元。

建筑主体为简洁的长方体结构，建筑外立面采用红色为主要色调。窗户的设计随意自然，使外立面显得生动、活泼。不对称的白色框架结构赋予立面以别致的立体外观。
